

**Addendum No. 2**

**CAPTAIN HENDRY HOUSE DECK RECONSTRUCTION**

**BID NO. 2021-03**

**June 24, 2021**

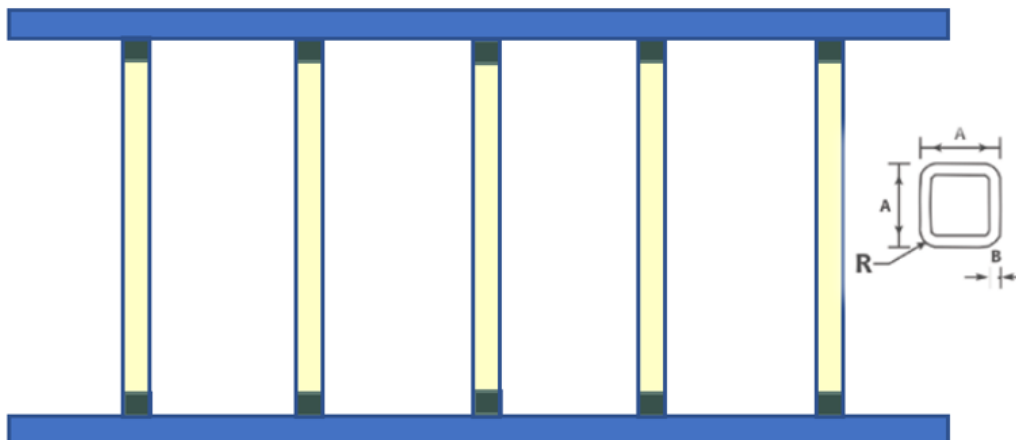

Subsequent to prospective bidders' comments, following is Addendum No. 2 to the City of LaBelle's captioned Bid for building improvements described as Captain Hendry House Deck Reconstruction.

Bidders are required to acknowledge receipt of this Addendum by attaching a copy of same to the Bid Proposal Form. Bidders are also requested to acknowledge receipt hereof by signing where indicated below and returning a copy to the Project Engineer's office by email to [rock@rockhendry.com](mailto:rock@rockhendry.com) or by fax to (863) 612-0014 as soon as possible.

This Addendum amends the captioned Bid Documents as follows:

1. Bidders shall use aluminum balusters (pickets) instead of wood. Accordingly, bidders are hereby instructed to prepare their bid to include 1.25" square aluminum tubing. Said baluster tubing shall be powder coated white with a matt finish. A brochure from Town and Country is attached as an example and an excerpt therefrom (see page 33) is shown below. The means by which balusters are attached shall not be visible. A 1"x 1" square tubing or some other insert is recommended to be screwed to the upper and lower rails which will receive the vertical balusters. The successful bidder will submit shop drawings of the rail and picket system to the Project Engineer for approval before installation.

<b>Radius Square Tube – Mill Finish</b>						
6063-T52, QQ-A-200/9						
Part#	Description				Length	Approx. Wt./Ft.
	A"	x	B"	R		
6652024	1¼"	x	.093"	.157	24'	.516#
LI85697	1¼"	x	.100"	.250	24'	.511#

2. The skirting around the building shall be replaced with a longer skirting approximately 26” to eliminate the need for lattice as shown in the photo below. Marine plywood may be used for a back piece provided a durable exterior caulk like *Dymonic 100* is used to prevent water from being trapped between the plywood and “dental” work.

3. Plans require the KDAT wood to be painted. By this Addendum, all wood used on the project shall be allowed to cure in place as recommended by the manufacturer and then sealed with two coats of semi solid stain such that the colors match the parts being replaced.

Please call or email with questions, if any. Thank you.
